YOUTH OPINION SURVEY
UKRAINIANS IN POLAND
SPECIAL SUBSAMPLE

June-July 2023
Detailed Methodology

The survey was conducted by Rating Group on behalf of the International Research and Exchanges Board (IREX). Survey data was reviewed and analyzed by the International Republican Institute's Center for Insights in Survey Research (CISR).

The survey was conducted from June 23 to July 1, 2023 through face to face interviews with those 16 and older, and through phone interviews with those 10-15 (following face-to-face consent by their parent/guardian.)

Intercept sampling was conducted near centers for assistance of Ukrainian refugees in Warsaw, Krakow, Wroclaw and Bydgoszcz. While steps were taken to maximize randomization, such as intercepts being hold on different days and times, stationing interviewers at multiple centers per city, etc., the sample cannot be assumed to represent all Ukrainian refugees aged 10-35 currently in Ukraine.

The sample consists of Ukrainians who arrived in Poland since the beginning of Russia's full-scale invasion of Ukraine on February 24, 2022. The sample is comprised of n=100 respondents aged 10-12, n=100 respondents aged 13-15 and n=300 respondents aged 16-35. Each group received a questionnaire appropriate to their age.

The overall response rate is 60%.

Charts and graphs may not add up to 100% due to rounding.

Questions routed to fewer than 25 respondents are not presented in the report.

This study was made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents are the responsibility of IRI and do not necessarily reflect the views of IREX, USAID or the United States Government.
The protocol for Youth Opinion Survey 2023 was assessed through an expedited research ethics review by HML Institutional Review Board. This study’s human subjects’ protection protocols received research ethics review approval on 05/31/2023 in accordance with the requirements of the US Code of Federal Regulations for the Protection of Human Subjects (45CFR46 & 45CFR46.110) and were expedited by (7) Research on individual or group characteristics or behavior. HML IRB is authorized by the U.S. Department of Health and Human Services, Office of Human Research Protections (IRB #00001211, IORG #0000850), and has DHHS Federal-Wide Assurance approval (FWA #00001102).

Verbal informed consent has been received from all respondents. For the category of 10-15 years old, the youngest category within the survey, consent has been received from parents or legal guardians. A consent form included information on the survey topic, confidentiality, voluntary participation, rights to not answer some or any questions and refusal to participate at any moment.

Rating Group comply with its policies on child protection during participation in research activities, national legislation and European Society for Opinion and Marketing Research guidelines. An expert in conducting surveys with children, Marianna Tkalych - Full Professor in Psychology, CEO in Research Laboratory “Rating Lab”, Psychologist-specialist of forensic psychological examination was involved in data collection tools development.

Rating Group has not stored personal information on participants.
