Michel Daccache, Leadership for Sustainable Development NGO

Leaders for Democracy (LDF) 2017

Michel Daccache LDF 2017 alumnus from Lebanon and president of Leadership for Sustainable Development NGO, works on producing the elections toolkit amidst youth repulsion from casting their votes. He considers this tool to be a great and clear mechanism to educate youth about the importance of being engaged in choosing their representatives. Thanks to his continuous efforts in offering training in rural areas, he managed in the 2018 elections to improve the elections tolls from 49% to 80% participation stats and from 35000 cancelled votes cards to 0 and 20 cancelled votes from 1500 voters in both region one and two. He concludes that youth hold the power of change and commitment to make that happen.
